About Leadformance:

Leadformance is a “software as a service” company established in 2006 and producing web-based tools to create strong relationships between consumers, brands, and reseller networks. Our clients are large corporate firms with extended networks of point of sales throughout a country. We are a European/Canadian company with office locations in Montreal, London, Chennai, Paris and Annecy. Our development team is globally distributed through Europe, North America and India. We are a relaxed, fun loving and committed team of people!

Available position:

This role will involve working closely with the marketing department and liaising with the product department where you will be given various missions of creation and maintenance related to:

- Company's website (currently being revamped)
- Client's mini sites
- Brochures / leaflets
- Product & software interfaces / GUI
- PR and sales material
- Internal communication

Profile:

You will need to have design flair and naturally you will have an excellent understanding/ demonstrable experience with:

- CSS
- HTML
- Adobe Photoshop
- Illustrator / Indesign
- Dreamweaver (and a bit of Flash)
- Website design best practices

You must have a portfolio demonstrating strong design across multiple projects. You will also have excellent attention to detail; strong communication / interpersonal skills and a real desire succeed within a design role.

To apply:

Please send your CV to rh@leadformance.com
